Applied Vision partners with NDH Technical Services to provide local support in the Middle East

AKRON, OH – August 24, 2007 – Applied Vision, the leading provider of machine vision inspection systems for the container manufacturing industry, has selected Dubai-based NDH Technical Services as the exclusive provider of full-service sales and technical support services for two-piece container manufacturers in the Middle East.

“NDH has a very well established commercial and technical presence with all major two-piece manufacturers in the Middle East,” said Bud Patel, vice president of business development at Applied Vision. “Their comprehensive understanding of the can making process and mission of engineered excellence fits perfectly with Applied Vision’s commitment to providing the most reliable, accurate and easy-to-use vision inspection systems in the industry.”

“Our expert knowledge of the customer’s requirements enables us to source only the best machines from around the world to create a production line with the highest specification and reliability,” said Mick Flannery, technical director for NDH. “Applied Vision’s Genius® and KromaKing® machine vision inspection systems are definitely among the best. We’re very pleased to partner with them and add their expertise to the solution we bring to our customers.”

With Applied Vision demonstration equipment in-house, NDH will be able to conduct application studies and offer hands-on training. They will also maintain a full complement of replacement parts for Applied Vision systems. Three-piece can makers in the Middle East will continue to work with ParmaControls, another of Applied Vision’s strategic partners.

Applied Vision Company designs and manufactures application-specific machine vision inspection systems for packaging, food and beverage containers and color printing. Applied Vision systems are sold worldwide through Original Equipment Manufacturers (OEMs), Value Added Resellers (VARs), full-service distributors and company direct. For more information on Applied Vision’s machine vision solutions, visit www.appliedvision.com.
