Applied Vision Wins Multiple Vision System Order From Impress

AKRON, OH – April 20, 2009 – Furthering its commitment to superior quality, Impress Group has teamed up with Applied Vision to integrate vision inspection systems into its new plant in North America. The Genius® vision inspection systems will cover multiple easy-open end manufacturing lines for food cans.

“Impress Group chose to work with Applied Vision for its advanced technology, more than two decades of experience in the container industry and superior customer support. Above all, Impress knows that we are just as committed to ensuring the quality of their product as they are,” said Bud Patel, vice president of sales at Applied Vision.

Applied Vision Corporation designs and manufactures application-specific machine vision inspection systems for packaging, food and beverage containers and color printing. Applied Vision systems are sold worldwide through original equipment manufacturers (OEMs), value added resellers (VARs), full-service distributors and via company direct. For more information please visit www.appliedvision.com.
