Applied Vision partners with CCH Engineering in Europe and Southeast Asia

AKRON, OH – May 1, 2007 – Applied Vision Corporation, the global leader in machine vision inspection systems for the container manufacturing industry, has selected United Kingdom-based CCH Engineering Ltd. as a provider of full-service Genius® sales and technical support services for new two-piece container manufacturing lines and plants in Europe and Southeast Asia, including India.

“CCH Engineering’s well established commercial and technical presence with all major two-piece can manufacturers in Europe and Southeast Asia will enhance Applied Vision’s market coverage in these crucial regions,” said Bud Patel, vice president of sales at Applied Vision. “CCH’s comprehensive understanding of the can making process and mission of engineered excellence also fits perfectly with Applied Vision’s commitment to providing the most reliable, accurate and easy-to-use vision inspection systems in the industry.”

“Our in depth knowledge of the customers’ requirements gained from our operational and project experience enables us to source only the best machines from around the world to create a production line with the highest accuracy and reliability,” said Steve Higginson, managing director for CCH. “Applied Vision’s market leadership and advanced technology has made its systems the highest standard in the industry. We are very pleased to have been selected to provide the full service and support package for Applied Vision and add their expertise to the solutions we bring to our customers.”

About Applied Vision Corporation

Applied Vision Corporation designs and manufactures application specific machine vision inspection systems for packaging, food and beverage containers and colour printing. Applied Vision systems are sold worldwide through original equipment manufacturers (OEMs), value added resellers (VARs), full service distributors and company direct. For more information on Applied Vision’s machine vision solutions, visit www.appliedvision.com.
